

# CONCRETE GRINDER

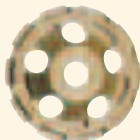

## EBS 125.40

MADE IN GERMANY

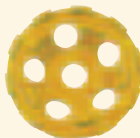

- The EBS 125.40 is the ideal tool to remove residual mud, mould, seams, old paint, as well as joint filters for tiling renovation. It can be used to smooth rough surfaces & clean concrete surfaces before applying new paint or coatings. Dust free working is provided by the possibility to connect to an industrial vacuum cleaner (connector diameter) 36 mm.

- Discs available
  - 1) Finishing & facing concrete, brick, lime sandstone, basalt, sandstone

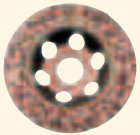

- 2) Finishing screed, new concrete, lime mortar & plaster, cement mortar, soft limestone.

- 3) Finishing Poroton & slate, removal of adhesives remnants & protective paints & high build coatings.

- 4) Tungsten carbide grit disc for levelling & reducing plaster, lime-sandstone, roughening wood & removing old paint.
